Infrastructure as a Service

Iocane offers a secure, highly available, 'on demand' infrastructure platform for organisations to run their business systems upon

This frees up in-house ICT personnel and capital, increasing productivity and efficiency and reducing cost to deliver real business value

Business benefits

Fully configurable and tailored solutions catering for a full range of business applications and users

Reduced staffing and upgrade costs. We manage, operate and upgrade the infrastructure service meaning you always have access to the latest technology, sourced from leading global providers

Scalable hardware infrastructure to meet your business needs now and into the future

Minimal or no up-front costs

Reduced business carbon footprint

24 hours a day, 7 days a week data centre monitoring and support

A world-class, secure platform to ensure your data cannot be accessed by other parties

We find solutions that effectively combine your existing assests with Iocane infrastructure

Our infrastructure is reliable ensuring little to no downtime

Solutions

Iocane Infrastructure as a Service provides an integrated platform that can incorporate:

Hardware	Wide area network
Software	Backup, recovery and archive

Iocane

Innovative IT Solutions

Better for business

Key features

● Flexible

We understand that business needs change so our IaaS offering is flexible and available 'on demand' to allow for this. Iocane is able to provide a variety of options, dependent upon your organisation's needs.

Your tailored infrastructure platform can be scaled up or down to reflect your business performance, meaning you can control your ICT spend and avoid over-capitalising.

● Secure technology platform

Iocane has adopted enterprise grade infrastructure from market leaders Cisco, VMware and NetApp to deliver a secure multi-tenant environment, ensuring that others cannot access your organisation's data.

Our infrastructure is highly available, continuously monitored and maintained by experienced engineers. Housed in two Adelaide based, purpose built data centres with resilient power, cooling and fire protection, our hardware is highly secure.

● Manageable

Management and administrative control is vital to any organisation whether your systems run in house or with a third party. We work with you to determine the level of administrative function you need, whether it be operating system level access or full support from Iocane technical personnel.

In all cases we deliver scheduled and on demand reporting, providing you with full visibility of your infrastructure utilisation, performance, availability metrics and other information needed to maintain a reliable and appropriate infrastructure solution.

● Predictable costs

Iocane's IaaS is available for a monthly fee and incorporates hardware, software, management and administrative access. This monthly operational cost is aligned to the resources that your business uses.

By running your business systems through Iocane's infrastructure platform you avoid the significant capital costs of equipment procurement or upgrading, licensing, data centre establishment or co-location fees, alongside reduced operational costs for support, management and administration.

Complementary Services

Other services available on Iocane's secure infrastructure platform include:

Disaster recovery

Backup, recovery and archive

Licensing

Burst to cloud

Self service provisioning

Teamed with Iocane's range of ICT Managed Services, Iocane IaaS provides comprehensive, tailored ICT solutions

Our Managed Services extend to:

Monitoring, management, maintenance and reporting of all ICT infrastructure including server, storage, network and security devices

Onsite engineering

Service desk

Why Iocane?

With more than 14-years of experience, we are one of South Australia's largest independent ICT solutions providers. We have a reputation for delivering innovative, value for money solutions.

We offer an integrated range of services and expertise to meet the ever-changing technology needs of business.

Our approach is different. We focus on the delivery of tailored ICT solutions that add value and deliver real results to business.

Our focus is about finding the right ICT solution for each business. We offer reliable, flexible ICT systems to help our clients manage their current and future needs.
